# 1. Introduction

This application is the product of a collaboration between Amsta and the Amsterdam University of Applied Sciences.

It's main purpose is helping the residents of amsta learn new skills with the aid of "errorless learning", a learning process that uses step by step to do lists to help people with memory problems relearn basic skills like cooking, brushing their teeth or making coffee.

The application consists of a home screen with tasks ordered by the time of day they are conducted, a login screen for both residents and caretakers and a back-end where caretakers can create new tasks, edit old ones and check up on the progress of the residents.

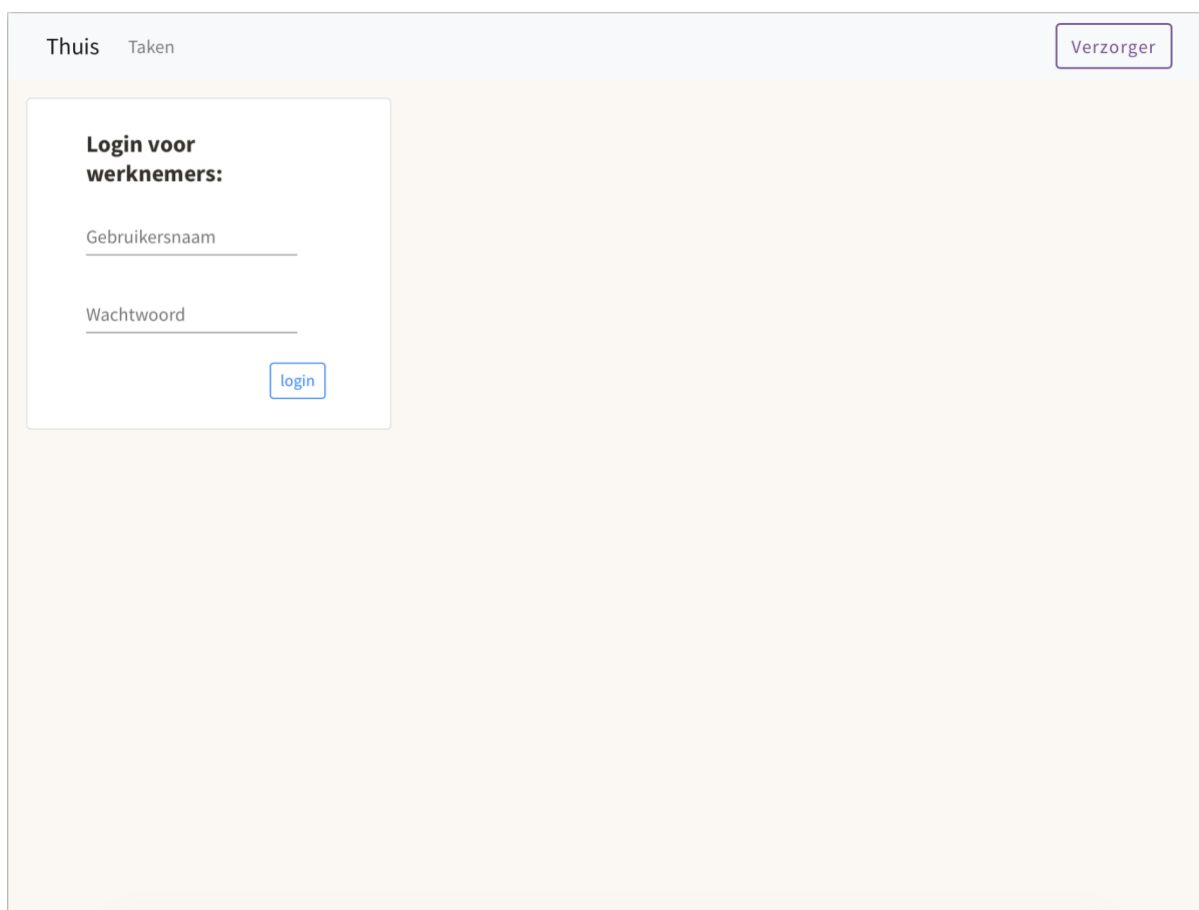

## 2. Instructions

### Amsta Employee

As an employee of Amsta, you are able to add, edit and remove tasks. You are also able to view statistics of residents and edit residents. The following items will explain how to do these simple tasks.

#### Login

Upon reaching the application's frontpage, you click on the "Verzorger" button in the upper right corner of the screen. This will take you towards the login screen (Picture 1).

Picture 1

"Gebruikersnaam" stands for username and "Wachtwoord" stands for password, to login you can fill in "root" for both input fields. Then press the login button to go towards the Employee dashboard.

Inside the employee dashboard you can add, edit and remove tasks however you like.

Button/Input	Action
Deze Taak Toevoegen	This button will save the task.
Sluiten	This button will close the task without saving the made changes.
Naam van de takenlijst	This inputbox is for the name of the task.
Beschrijving van de takenlijst	This inputbox is for a small description of the task.
Voer de begintijd in	This inputbox is for the start time of a task.
Voer de eindtijd in	This inputbox is for the end time of a task
+ Voeg extra tijd toe	This button will add two new input boxes for the start and end times of a task.
Kies bestand	This button let you add new image to the task.
Voeg Stap toe	This button will create a new step.

Table 1

Fill in these items and press “Deze taak toevoegen” to add the task.

## Edit Task

On the employee dashboard (picture 2), press the “Bewerken” at the right side of the desired task. This will take you to the same screen as add task. Edit the desired items (see table 1) and press “Deze taak opslaan” to save the changes.

## Logout Employee

On the employee dashboard (picture 2), press the red text “Uitloggen” on the left side of the screen to log out. After pressing this button you will be redirected towards the main screen of the application.

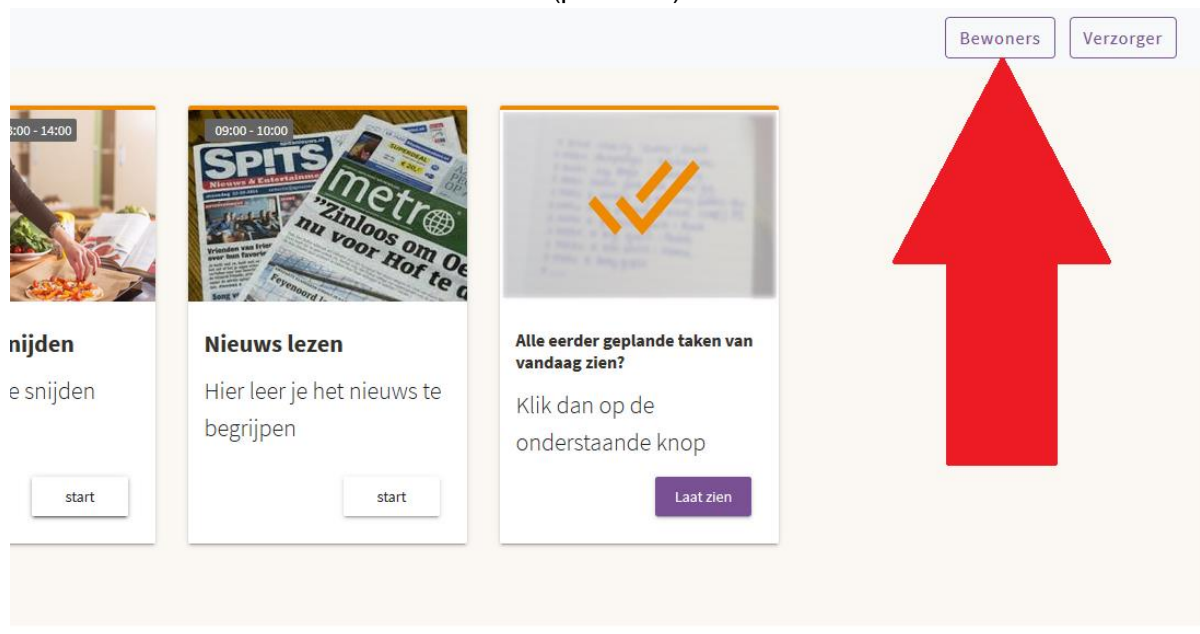

## Residents

In the application it is possible to manage and view statistics of the residents. Because of this it is important to know if the resident that is using the application is logged in.

### Login

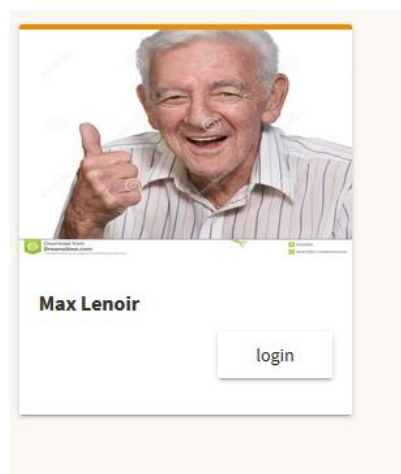

To login a resident you have to go towards the residents screen.

By pressing the “Bewoners” button on the top right corner of the screen you will be redirected towards the Residents screen. (picture 4)

Picture 4

When inside the residents screen search up the resident and press the login button on the bottom right corner of the resident. (picture 5)

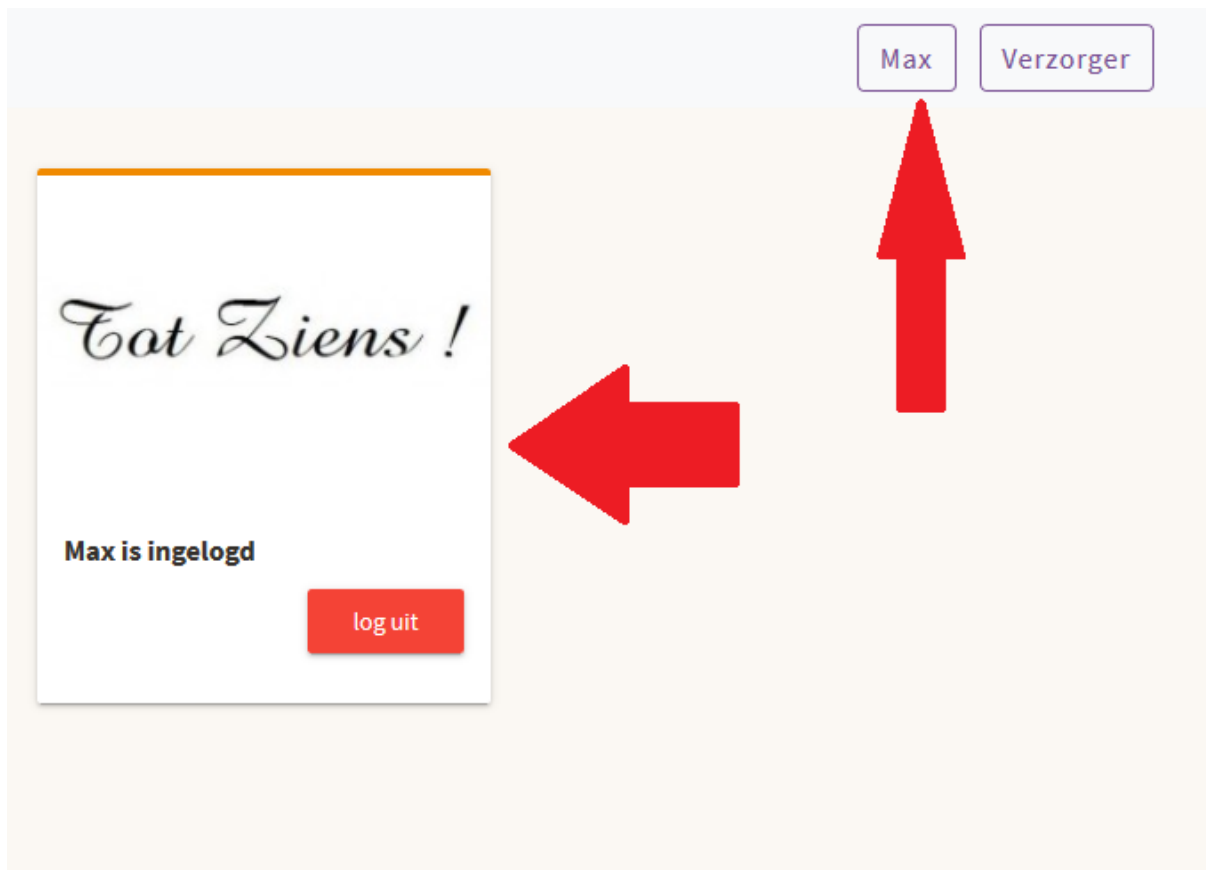

Picture 5

## Logout

If the resident is done working with the tablet he/she will get a message stating that he/she should give the table back to one of the employees.

Picture 6

When the tablet is returned you should logout the resident by going towards the resident screen. After going towards the resident screen you should press the “log uit” button inside the resident box.(Picture 6)

Afterwards the resident will be logged off and you can log in a new resident.
